

NATURALLY PURE

Water is life – and needs no additives. Like nature itself, our natural swimming pools, swimming ponds and water features are completely free from chlorine, active oxygen and synthetic pH regulators. Instead, the Balena system relies on sustainable, flexible filtration using a backwashable mineral medium. The result: residential properties, hotels and commercial facilities transformed into oases, lagoons and breathtaking aquatic landscapes – all over the world.

STUNNING AQUATIC LANDSCAPES

BALENA

ADVANTAGES

Chlorine-free pool system

Unlike conventional systems that rely on chlorinated water and large filtration zones, the Balena system offers distinct advantages – both in terms of sustainability and operating costs. Balena gives you a genuine chlorine-free pool system – ideal for any swimming pond, water feature or natural pool. Discover the benefits of the Balena system.

Visual and ecological enhancement

Increase your property's value with sustainable, biological aquatic landscapes.

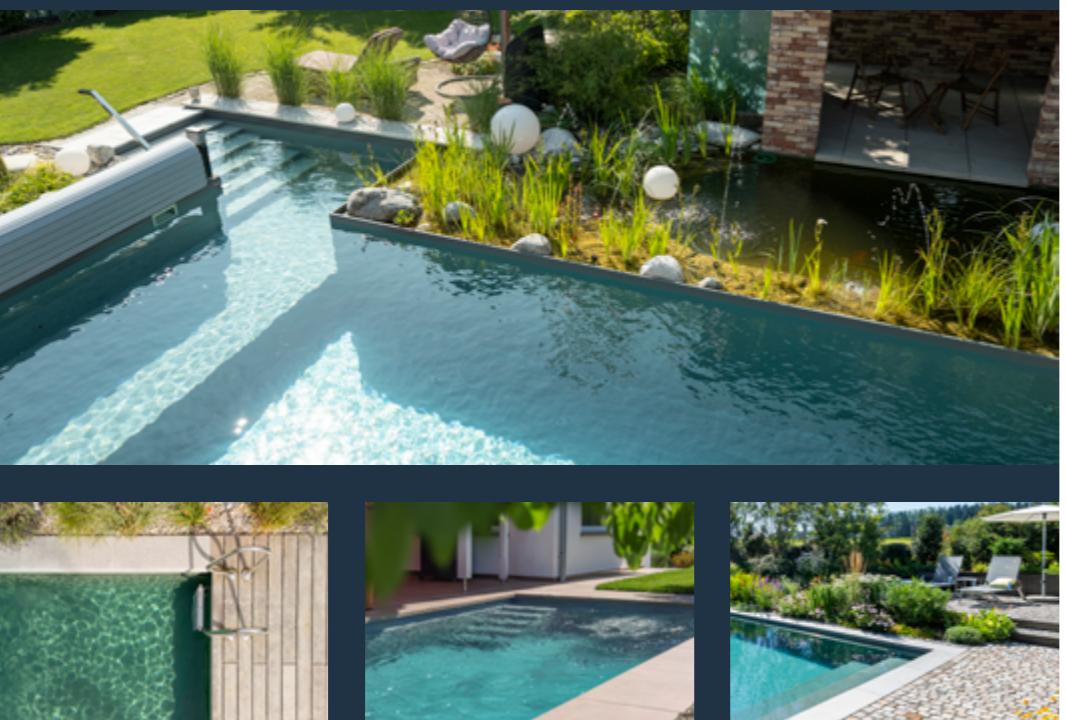

Free from chlorine

The Balena system uses powerful microbiology instead of harmful additives.

Maximum usable space

Our integrated filtration system lets you use up to 100% of your pool area.

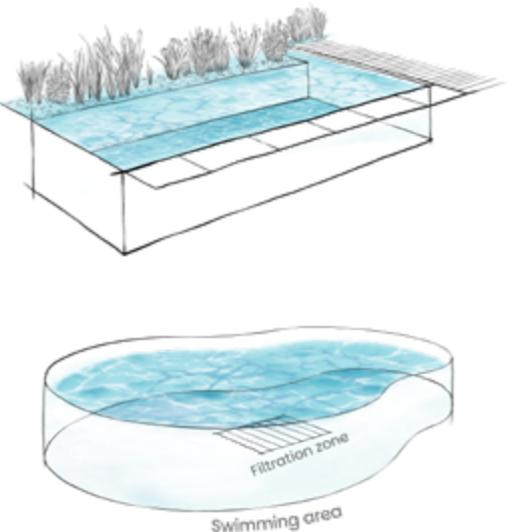

SYSTEMS

100%

Balena system

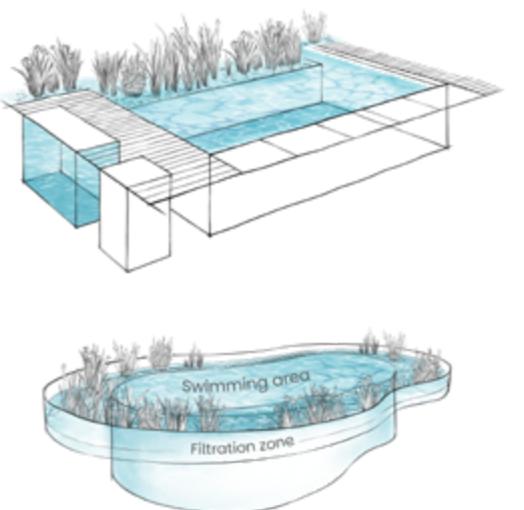

With the Balena system, you can make full use of the entire water surface.

70%

Conventional systems

Conventional systems limit the usable pool space to just 70%.

0% CHLORINE

Chemical-free swimming pools

Whether it's a natural swimming pool at a spa hotel, an aquatic landscape for your company headquarters, or a large lagoon to enhance a luxury property – Balena is the eco-conscious, resource-saving and technically advanced choice for clean water in both private and public settings.

5-star water quality

Indoors or out – the Balena system delivers top-tier water quality for all your water features.

Maximum user satisfaction

Reduced environmental impact and better for your guests' or residents' health – thanks to naturally clean water.

Lower operating costs

No ongoing chlorine dosing. No expensive wastewater disposal. Just clean savings.
